

Certified Pre-Owned GSP-1700

Mobile Satellite Phone

Globalstar provides true interoperability for the public and private sectors to communicate within and across agencies, jurisdictions via voice, data, or video-on-demand, in real-time, when needed, and as authorized. Personnel can quickly, and clearly, coordinate with co-workers when terrestrial networks are down.

KEY FEATURES

- **Powered by 100% satellite technology** – Works where cell phones don't.
- **Crystal-clear voice quality** – No “tunnel sound” or voice delay during conversation like the competition.
- **Utilizes Globalstar's fastest data speeds** – 4X faster than any other mobile satellite company (9600 hotspot required, sold separately).
- **Canada-based phone number** – Direct dialing of 911 services right out the box while our competitors use country codes, making dialing very difficult.

OPERABILITY BENEFITS

- **Instant Infrastructure** – Globalstar supplies communications in areas where existing infrastructure is outdated, insufficient, or damaged.
- **Independent of Terrestrial Infrastructure** – Globalstar provides redundancy in the case of terrestrial network outages. Business, recovery efforts and communication between loved ones never has to stop when using Globalstar.
- **Temporary Network Solutions** – Globalstar can often provide the only practical, short-term solution for getting necessary information in and out such as phone calls, emails or document and image sending.
- **Rapid Provisioning of Services** – Since satellite solutions can be setup quickly using the GSP-1700 mobile satellite phone you can achieve a high level of communications rapidly without high budget expenditures.

DATA NETWORK AND SERVICES
