

SYSCOM Instruments SA

Globalstar Value Added Reseller

Company Presentation

SYSCOM Instruments SA, designer and manufacturer of industrial electronic products, was established in Zurich in 1974 as an engineering company. One of the founders, Werner Bolleter, is currently managing director of SYSCOM Instruments SA. In 1992 SYSCOM expanded to Sainte-Croix into the orphaned industrial complex of Hermes Precisa SA. The production facility moved up the ladder to the rank of research and production center and became head office of SYSCOM in 1998. In the same year SYSCOM was bought by the German Bartec group.

The company has some 50 employees, most of them in Sainte-Croix, the Zurich branch office focuses on marketing and sales.

The company is both ISO 9001 (TÜV) and ATEX certified.

SYSCOM Instruments manufactures and sells its own products worldwide, mainly vibration and earthquake monitoring equipment for safety related applications.

Typical examples are Seismic Instrumentations of nuclear power plants, dams and buildings or vibration measurement systems for civil engineering and blasting applications.

SYSCOM Instruments also manufactures electronics, matching the highest industrial standards.
