

VISIOFLEET

Globalstar Value Added Reseller

Company presentation

Visiofleet is specialised in supplying turnkey tracking solutions including Hardware and Software.

mapRACE plots the GPS positions of competitors in real-time. As positions are stored in database, mapRace replays them on the map later.

- mapRACE is designed to be customized to fit it in the graphical requirements of the Internet site of the race for a full integration .
- We have a complete set of products to equip competitors, depending on the race, the competitors, the environment, the continent, etc.
- The replay functions are designed for every race. Group start or single start, one stage or multiple stages. For the single start, the replay function can simulate a group start to show each competitor as in a pack.
- Different solutions to fit in budget: rental or sale.
- mapRACE is easy to install on competitors and easy to integrate into the Internet site of the race.
