

## *Don't Count on Luck Anymore, Rely on VMD*

### **VMD Presentation**

Founded in 2009, Virtual Mobile Data (VMD) has become a global satellite solutions provider. The company's success comes from its innovative vision and customer oriented approach.

Since its creation, VMD has established itself as a leader in disaster recovery solutions, excelling in introducing geolocation, distress solutions, and voice and data services to suit complex enterprise networks in major regions around the world.

Delivering excellence is the principle upon which VMD has been founded. This strong foundation and commitment to excellence is the driver of our technical innovation, highly qualified staff and unparalleled local market expertise".
