GSP-1700 for Windows XP/2000

Creating a Communications Port for your GSP-1700

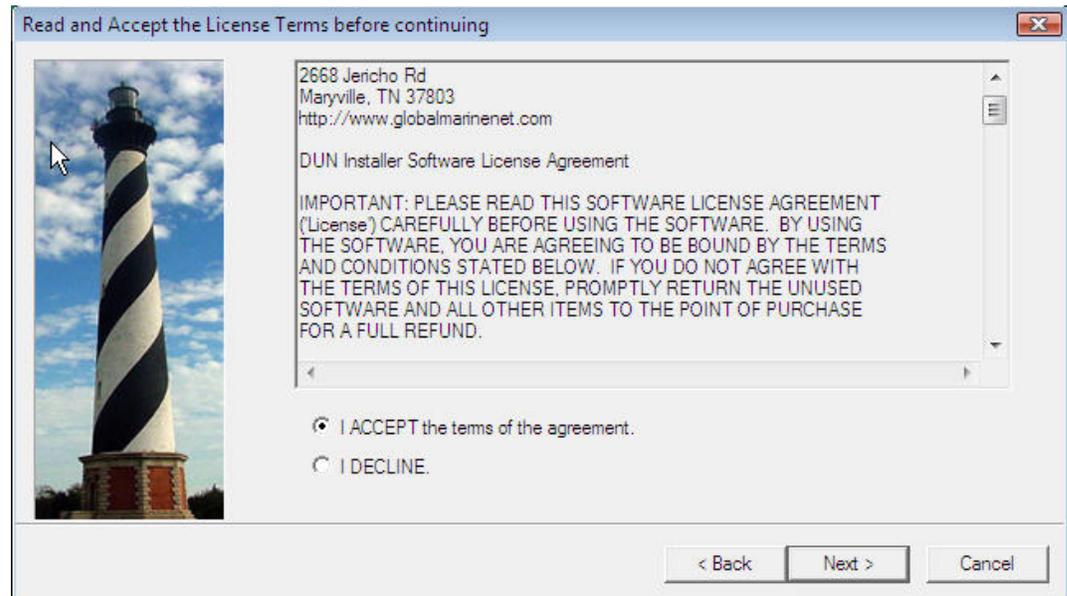

- Download and launch the program, Installer.exe, on your computer

NOTE: IF YOU ARE ENTERING THESE INSTRUCTIONS VIA THE 'SATELLITE HELP' BUTTON ON THE QUICK INSTALL PAGE OF THE Installer PROGRAM, [CLICK HERE](#)

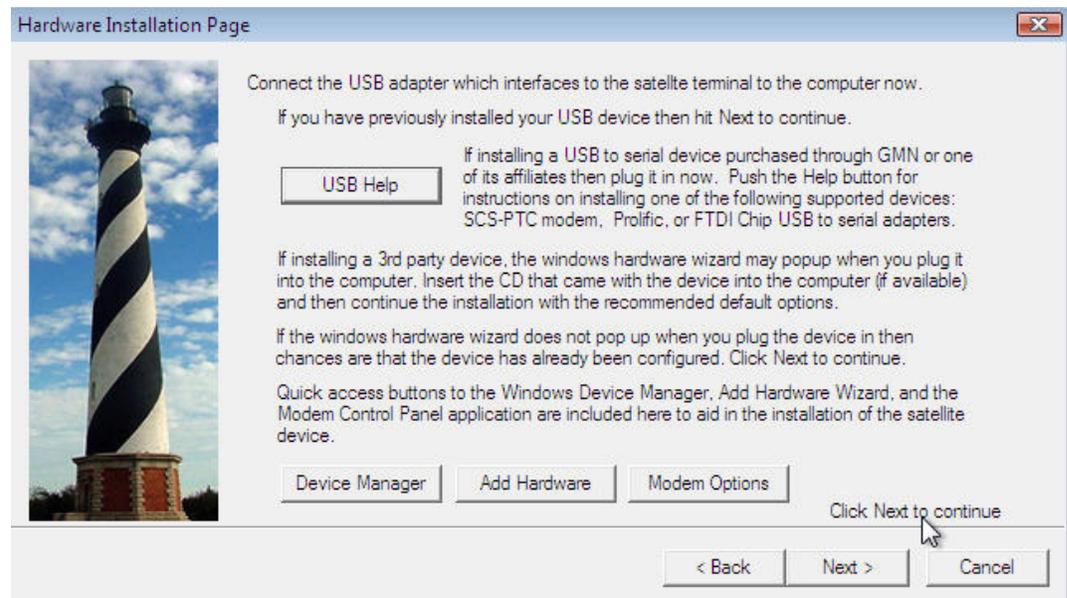

- Click 'Next' to begin your driver install

- Accept the software license to continue the install

- Click 'Next' on the USB adapter screen (not necessary for install of GSP-1700).

- Connect your GSP-1700 to your computer.

NOTE: If ever you have previously connected your GSP-1700 to your computer and were NOT successful in creating a comm port for it, be sure on this attempt to connect the GSP-1700 to a USB port that is different from that to which it was connected on your first attempt. If you cannot do so, please contact Globalstar Customer Care at 1-877-452-5782.

- Upon connecting your GSP-1700 to your computer, the Windows Add New Hardware Wizard will appear.
- Select '**No, not this time**' and click Next.

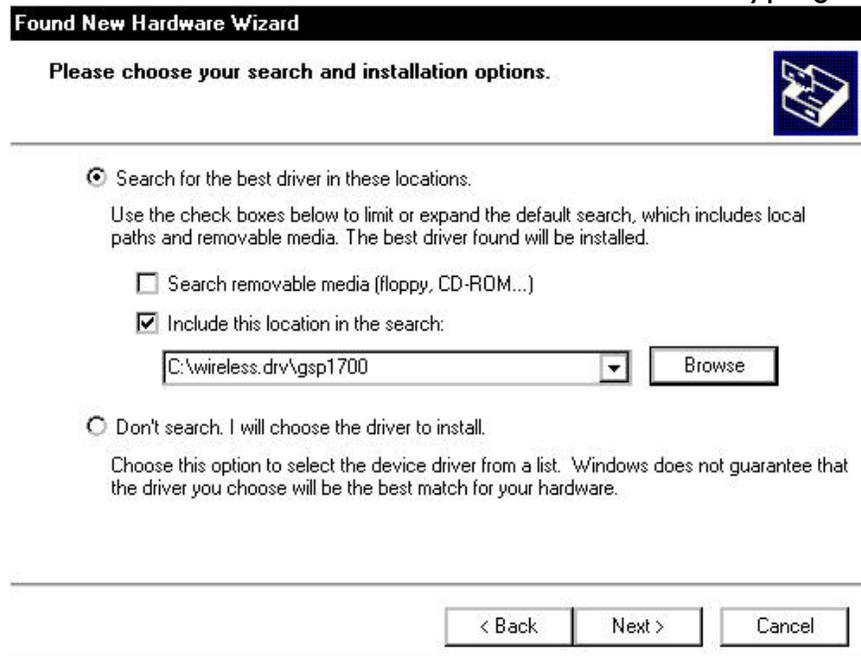

- Select '[Install from a list or specific location \(Advanced\)](#)' and click Next.

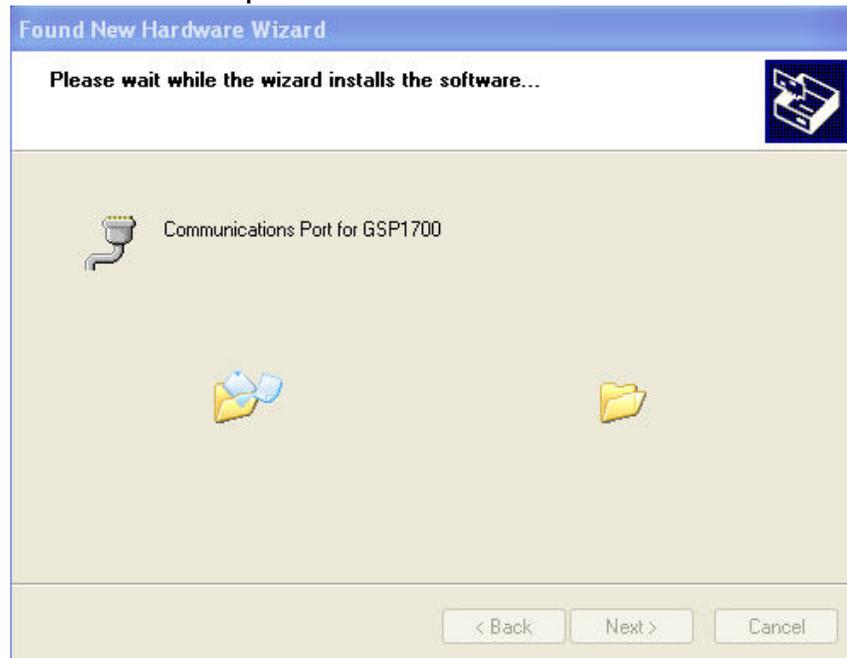

- Check the selection, '[Include this location in the search:](#)' and type

c:\wireless.drv\gsp1700

in the Browse box. Click the Browse button after typing this location.

- Windows will begin searching for instructions it needs to create a communications port for the GSP-1700.

- After a period of time it will post a warning regarding Windows Logo certification.

Select 'Continue Anyway'.

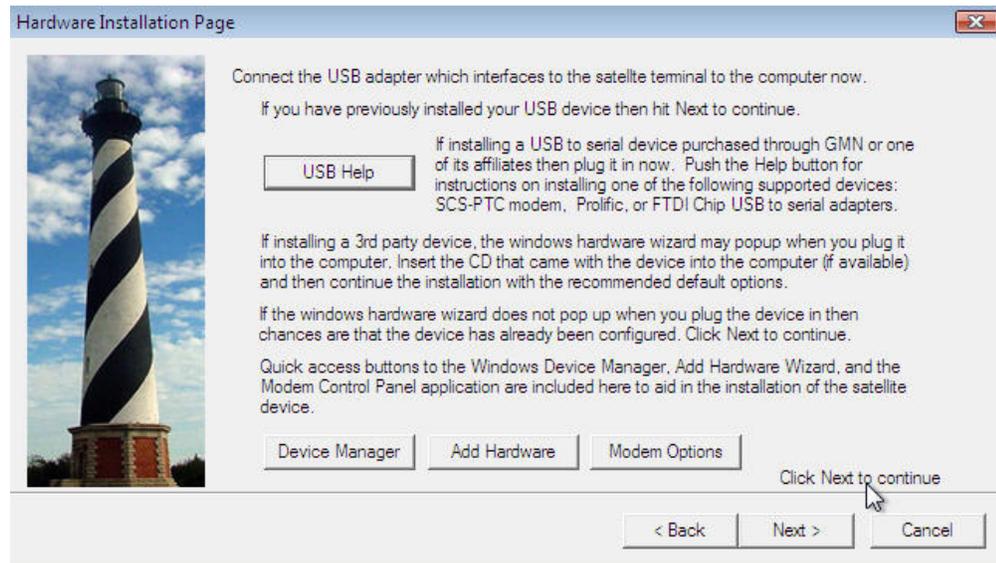

- Select Finish on the next screen to complete the creation of a communications port for your GSP-1700.

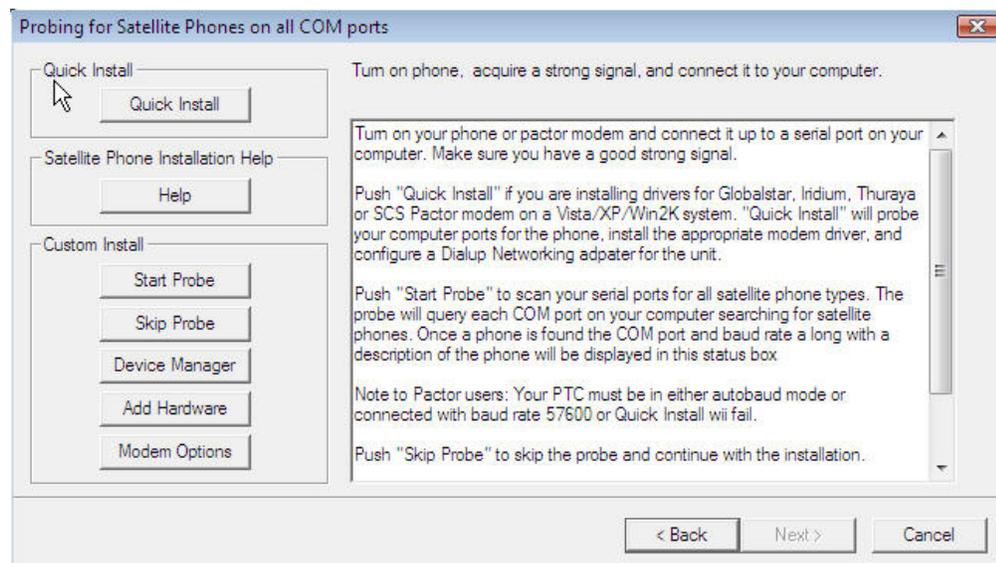

- Click on '[Installing Drivers and Dial-Up Networking for your GSP-1700](#)' within this Help file to complete your phone installation.

Installing XP/2000 Drivers and DUN for your GSP-1700

- If you have not done so yet, create a communications port for your GSP-1700 on your computer. [CLICK HERE](#) for instructions and assistance with creating this comm port.
- Verify your GSP-1700 is powered on and connected to your computer. Click 'Next'.

- Select the **QUICK INSTALL** button.

- The installer will begin probing your computer's communication ports for your GSP-1700. This process may take several minutes. The more communication ports on your computer, the longer the duration of comm port probing. Please be patient.

- When the installer finds the GSP-1700 it will ask you to confirm the installation of the modem 'Globalstar GSP-1700 Modem'. Click **OK**.

- The installer will advise you that the Globalstar GSP-1700 has been successfully installed. Click **Next**.

- Click **Finish** . You are now ready to [use your GSP-1700 for data connections](#) .

Using the DUN to Connect to Globalstar Data
