

**EU – TYPE EXAMINATION CERTIFICATE**  
**RADIO EQUIPMENT DIRECTIVE 2014/53/EU**  
**Annex III Module B**

**MANUFACTURER**

Name	:	Globalstar, Inc.
Address	:	1351 Holiday Square Blvd Covington, LA 70433
Contact Name & Title	:	Matthew Kapral, Sr. QA & Compliance Engineer
Email	:	Matthew.kapral@globalstar.com
Phone number	:	+19853351649

**PRODUCT DESCRIPTION**

Trademark/Trade Name	:	Globalstar
Model Number	:	RM200M
Product Description	:	The RM200M is a module designed to be the central control unit for a host device that requires connecting to the Globalstar satellite network for half-duplex communication interfacing. The module contains GPS for positioning and BLE for connecting to IoT sensors used in a variety of applications.

**NOTIFIED BODY**

Certificate issued by	:	Notified Body 1177, IIA Lab Services, LLC
Certificate number	:	E1177-255912
Name and Signature	:	Bruno Clavier  Date: October 6, 2025

The device shall be marked as follows: 

Based on the evidence presented in the Technical Documentation, IIA Lab Services, LLC, as appointed Notified Body, has issued this EU-Type Examination Certificate in accordance with Annex III Module B. The product described appears to be in conformity with the essential requirements Article 3.1(a), 3.1(b), and 3.2 of RED 2014/53/EU. This certificate relates only to the documents as provided to IIA Lab Services, LLC and is valid up to (1) the date of cessation of presumption of conformity of any of the superseded standards which were used for testing this product and assessed by Notified Body or (2) the date of modifications to the approved type that may affect the conformity of the apparatus with the essential requirements of this Directive or the conditions for validity of that certificate, whichever comes first.

<b>IIA Lab Services, LLC.</b> 13146 NW 86th Drive, Suite 400 Alachua, FL 32615 USA <a href="http://www.industrial-ia.com">www.industrial-ia.com</a> A2LA Accredited (Certificate No. 0955.02)	This Certificate is issued under the provision that IIA Lab Services, LLC nor its subsidiary companies accept any liability concerning the contents of this document other than forced by law. Reproduction of the Certificate (with Annex) in full is allowed. Reproduction of parts of this certificate may only be allowed by written permission of IIA Lab Services, LLC.

**EU – TYPE EXAMINATION CERTIFICATE**  
**E1177-255912**

Date: October 6, 2025

**PRODUCT SPECIFICATIONS**

Intended Use / Category :	Half-Duplex Satellite Module – Used to send and receive messages over Globalstar’s satellite network.
RF output power :	24.08 dBm (Conducted)
Frequency range (MHz) :	1610 MHz – 1620 MHz
Modulation :	DSSS-BPSK
Antenna type :	Ceramic Patch

Intended Use / Category :	Bluetooth Low Energy – Used to send and receive raw data from sensors used in various applications. Data is queued and included in device messages sent over Globalstar’s satellite network.
RF output power :	9.5dBm (Conducted)
Frequency range (MHz) :	2402 – 2480 MHz
Modulation :	GFSK
Antenna type :	SMT Chip

The following standards were applied:

#### ESSENTIAL REQUIREMENTS

Essential Requirement	Standard Number & Version
Health (Article 3.1a) :	EN 62311 (2020)
Safety (Article 3.1a) :	EN 62368-1:2014 / AC:2015
EMC (Article 3.1b) :	EN 301 489-1 V2.2.3 EN 301 489-17 V3.2.4 EN 301 489-19 V2.2.0 EN 301 489-20 V2.1.2
Radio (Article 3.2) :	EN 303 413 V1.2.1 EN 301 441 V2.1.1 EN 300 328 V2.2.2
Cybersecurity (Article 3.3d) :	Assessment not requested
Cybersecurity (Article 3.3e) :	Assessment not requested
Cybersecurity (Article 3.3f) :	Assessment not requested
Emergency Service (Article 3.3g) :	Assessment not requested
Common Chargers (Article 3.4) :	Assessment not requested

#### ELEMENTS ASSESSED

#	Description	
1.	A general description of the radio equipment including: (i) Photographs or illustrations showing external features, marking and internal layout; (ii) Versions of software or firmware affecting compliance with essential requirements; (iii) User information and installation instructions;	<input checked="" type="checkbox"/>
2.	Conceptual design and manufacturing drawings and schemes of components, sub-assemblies, circuits and other relevant similar elements	<input checked="" type="checkbox"/>
3.	Descriptions and explanations necessary for the understanding of those drawings and schemes and the operation of the radio equipment	<input checked="" type="checkbox"/>
4.	List of the harmonized standards applied in full or in part, the references of which have been published in the Official Journal of the European Union, and, where those harmonized standards have not been applied, descriptions of the solutions adopted to meet the essential requirements set out in Article 3, including a list of other relevant technical specifications applied. In the event of partly applied harmonized standards, the technical documentation shall specify the parts which have been applied	<input checked="" type="checkbox"/>
5.	Copy of the EU Declaration of Conformity	<input checked="" type="checkbox"/>
6.	An explanation of the compliance with the requirement of RED Article 10(2) and of the inclusion or not of information on the packaging in accordance with RED Article 10(10)	<input checked="" type="checkbox"/>
7.	Risk Assessment. RED Annex III module B - Analysis and assessment of the risk(s)	<input checked="" type="checkbox"/>

#### TEST REPORTS ASSESSED

Type of Test Report	Test Report Number	Issue Date/Rev. No.
Radio	25024 1	Sep. 30, 2025 / Rev 1
Radio	25024 2	Sep. 30, 2025 / Rev 1
Radio	25024 3	Sep. 30, 2025 / Rev 1
EMC	25024 4	Sep. 29, 2025 / Rev 1
Health	25024 5	Sep. 17, 2025 / Rev 0
Safety	RF 25019	Jun. 30, 2025 / Rev 0
Safety	D50909S1	Sep. 08, 2025 / Rev 0

**This certificate is issued under the following additional and non-exhaustive list of provisions of the Radio Equipment Directive (2014/53/EU) of the European Parliament and the Council of the European Union:**

1. **Article 10(1):** When placing their radio equipment on the market, manufacturers shall ensure that it has been designed and manufactured in accordance with the essential requirements set out in Article 3.
2. **Article 10(2):** Manufacturers shall ensure that radio equipment shall be so constructed that it can be operated in at least one Member State without infringing applicable requirements on the use of radio spectrum.
3. **Article 10(4):** Manufacturers shall keep a copy of the EU-type examination certificate, its annexes and additions together with the technical documentation at the disposal of the national authorities for 10 years after the apparatus has been placed on the market.
4. **Article 10(5):** Manufacturers shall ensure that procedures are in place for series production to remain in conformity with this Directive. Changes in radio equipment design or characteristics and changes in the harmonised standards or in other technical specifications by reference to which conformity of radio equipment is declared shall be adequately taken into account.

When deemed appropriate with regard to the risks presented by radio equipment, manufacturers shall, to protect the health and safety of end-users, carry out sample testing of radio equipment made available on the market, investigate, and, if necessary, keep a register of complaints, of non-conforming radio equipment and radio equipment recalls, and shall keep distributors informed of any such monitoring.

5. **Article 10(6):** Manufacturers shall ensure that radio equipment which they have placed on the market bears a type, batch or serial number or other element allowing its identification, or, where the size or nature of the radio equipment does not allow it, that the required information is provided on the packaging, or in a document accompanying the radio equipment.
6. **Article 10(7):** Manufacturers shall indicate on the radio equipment their name, registered trade name or registered trade mark and the postal address at which they can be contacted or, where the size or nature of radio equipment does not allow it, on its packaging, or in a document accompanying the radio equipment. The address shall indicate a single point at which the manufacturer can be contacted. The contact details shall be in a language easily understood by end-users and market surveillance authorities.

Excerpts from Blue Guide:

- If the manufacturer (declaring himself as a manufacturer by putting his name and address on the product) is **outside the EU** and the products are placed on the Union market by an importer, the product will bear two addresses: the one of the manufacturer and the one of the importer. Indicate the following three elements: his (1) name, (2) registered trade name or registered trade mark and (3) a single contact postal address at which they can be contacted on the product or when not possible because of the size or physical characteristics of the products, on its packaging and/or on the accompanying documentation. The single contact point may not necessarily be located in the Member State where the product is made available on the market. (Notes: However, if the importer acts as the manufacturer's Authorised Representative, then only the importer's address is required on the product.)
- If the original manufacturer is **outside the EU** and the importer places the product on the market under his own name or trademark or modifies the product already placed on the market (in such a way that compliance with the applicable requirements may be affected), the importer is considered the manufacturer. The only address that in this case will figure on the product (or packaging or accompanying document) is the address of the importer who is considered as the manufacturer.
- If the manufacturer is **within the EU**, the product will bear only one (manufacturer's) address as there is no importer involved.
- If the manufacturer is **within the EU** (a company located in the EU declaring itself to be a manufacturer by putting its name and address on the product) although the products are manufactured outside the EU, that company is considered to be the manufacturer who places the product on the Union market, even if actual importation is done by another company. In this case there is no importer in the meaning of the importer's definition and it is sufficient to put only the manufacturer's address.

7. **Article 10(8):** Manufacturers shall ensure that the radio equipment is accompanied by instructions and safety information in a language which can be easily understood by consumers and other end-users, as determined by the Member State concerned. Instructions shall include the information required to use radio equipment in accordance with its intended use. Such information shall include, where applicable, a description of accessories and components, including software, which allow the radio equipment to operate as intended. Such instructions and safety information, as well as any labelling, shall be clear, understandable and intelligible.  
The following information shall also be included in the case of radio equipment intentionally emitting radio waves:  
(a) frequency band(s) in which the radio equipment operates;  
(b) maximum radio-frequency power transmitted in the frequency band(s) in which the radio equipment operates.
8. **Article 10(9):** Manufacturers shall ensure that each item of radio equipment is accompanied by a copy of the EU declaration of conformity or by a simplified EU declaration of conformity. Where a simplified EU declaration of conformity is provided, it shall contain the exact internet address where the full text of the EU declaration of conformity can be obtained. The simplified EU declaration of conformity is to be placed in the user's manual:  
*Hereby, [Name of manufacturer] declares that the radio equipment type [designation of type of radio equipment] is in compliance with Directive 2014/53/EU.*  
*The full text of the EU declaration of conformity is available at the following internet address:xxxxx*
9. **Article 10(10):** In cases of restrictions on putting into service or of requirements for authorisation of use, information available on the packaging shall allow the identification of the Member States or the geographical area within a Member State where restrictions on putting into service or requirements for authorisation of use exist. Such information shall be completed in the instructions accompanying the radio equipment. The Commission may adopt implementing acts specifying how to present that information. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 45(2).
10. **Article 10(11):** Manufacturers who consider or have reason to believe that radio equipment which they have placed on the market is not in conformity with this Directive shall immediately take the corrective measures necessary to bring that radio equipment into conformity, to withdraw it or recall it, if appropriate. Furthermore, where the radio equipment presents a risk, manufacturers shall immediately inform the competent national authorities of the Member States in which they made the radio equipment available on the market to that effect, giving details, in particular, of the non-compliance, of any corrective measures taken and of the results thereof.
11. **Article 10(12):** Manufacturers shall, further to a reasoned request from a competent national authority, provide it with all the information and documentation in paper or electronic form necessary to demonstrate the conformity of the radio equipment with this Directive, in a language which can be easily understood by that authority. They shall cooperate with that authority, at its request, on any action taken to eliminate the risks posed by radio equipment which they have placed on the market.
12. **Article 19(2):** On account of the nature of radio equipment, the height of the CE marking affixed to radio equipment may be lower than 5 mm, provided that it remains visible and legible.
13. **Article 20(1):** The CE marking shall be affixed visibly, legibly and indelibly to the radio equipment or to its data plate, unless that is not possible or not warranted on account of the nature of radio equipment. The CE marking shall also be affixed visibly and legibly to the packaging.
14. **Annex III Module B, Point 7, Declaration of Conformity:** The manufacturer shall inform the notified body that holds the technical documentation relating to the EU-type examination certificate of all modifications to the approved type that may affect the conformity of the radio equipment with the essential requirements of this Directive or the conditions for validity of that certificate. Such modifications shall require additional approval in the form of an addition to the original EU-type examination certificate.
15. **Annex VI Declaration of Conformity, Point 8:** Where applicable, description of accessories and components, including software, which allow the radio equipment to operate as intended and covered by the EU declaration of conformity.
16. **Product Specifications:** The antenna gain and any other data is provided by the applicant.
